

Barcelona Training School – on Inter and Transdisciplinary Urban Research (13-16 February 2017)

Venue: Centre de Cultura Contemporània de Barcelona (CCCB)

Address: Carrer de Montalegre, 5, 08001 Barcelona

AULA 2

Barcelona Training School will provide methodological foundations and experience in designing and implementing inter/ transdisciplinary urban research.

The Training School is organised around a common framework of sustainable urban research and problem solving based on the interplay of the following five key competences: System thinking competence, anticipatory competence, normative competence, strategic competence and interpersonal competence.

Barcelona Training School will be linked to the Contemporary Culture Centre of Barcelona (CCCB) events focusing on Climate Change. Thus, the training school will also address questions as:

- How academic institutions translate to the citizens the need for behavioural change regarding to Climate Change? –communication/educational challenge.
- How scientific research is influenced by social values and preferences and is able to integrate citizens' knowledge? –knowledge creation challenge.
- How cultural institutions could contribute towards the process of involving citizens and scientists, as well as practitioners and politicians, in co-creation processes related to both knowledge and political action? - political challenge.
